Smart Contract Deployment
> Contract holds project details and rules
> Adds data into block after creation

Contribution Period > Funds held securely within contract
> Contributors send cryptocurrency (ETH) to contract

Goal Achievement Check > Contract tracks funding progress > If goal reached:

> Contract executes actions for project initiation

> Funds released to project creator

Refund Process (If Applicable)

> If goal not met within timeframe:

> Contributors can request to get contributions back
> Contract initiates refund process

Feedback and Rating
> Users provide feedback and ratings for projects

Completion and Delivery
> Project creator executes project
> Deliver promised outcomes
